### Certified ScrumMaster

Scrum Alliance (2018)

## 👤 VOLUNTEERING

### Technovation

Mentor (2021)

## 💼 PROFESSIONAL EXPERIENCE

### Cogency Global, Inc (Jan 2024 – Jun 2025)

#### Application Developer

- In-house application development supporting various operations teams
- Full stack development for Angular frontends and .NET backends
- Prioritized TypeScript best practices during development and code reviews
- SQL development within a well-established stored procedure environment
- Team specialty was consumer-facing data intake applications
- Supported existing apps and facilitated the delivery of two new ones
- Integrated with established team and served as a mentor to teammates
- Participated in regular design meetings and stakeholder discussions

### Creed Interactive (Feb 2021 – Sep 2023)

#### Senior Developer

Client: **ConvergeOne**

- Maintained, supported and enhanced a custom React chat application
- Worked closely with client team on integration, enhancements and training
- Performed code reviews and mentorship on client's other projects

#### Developer

Client: **Delta Dental of Michigan**

- Rapidly familiarized myself with tech stack and delivered immediate value
- Advocated good practice adoption within client's SAFe operating structure
- Directed the urgent delivery of 2,600+ QA tests and systemic improvements

### Perficient, Inc. (Mar 2018 – Feb 2021)

#### Senior UI Developer

Client: **Poly, Inc.**

- Created proof-of-concept prototypes for upgrading primary site navigation
- Supported rebranding efforts through a variety of frontend enhancements

#### Full Stack Developer

Client: **Mitsubishi UFJ Financial Group, Inc.**

- Enhanced and supported client's business-critical online trust & custody portal
- Troubleshoot complex issues across the frontend, backend and database
- Migrated important business functions away from legacy technology
- Achieved recognition for tenacious and innovative problem solving

#### Solutions Developer

Client: **Adobe, Inc.**

- Assisted Adobe's clients with setup of Adobe's custom User Sync Tool
- Transitioned 50+ client teams from serial licensing to named user deployment
- Developed a simulated roster system REST API for reaching more clients
- Crafted customized business intelligence reporting functionality

### Do Good Tech (Aug 2017 – Feb 2018)

#### Front End Developer

- Contributed to the development of a coupon redemption application
- Planned a strategy for leveraging dynamic forms for user-sourced content
- Recreated AngularJS brochureware site in Angular 4 within time constraints
